

**Inspector's MIQs -
Supplementary Question to
the Council on Housing
Supply at 2017**

The Plan's approach to housing requirement and supply relates to the period 2011 to 2031. Information is included in the Plan about completions between 2011 and 2016, and expected supply from sites with planning permission, windfalls and allocated sites from 1 April 2016.

The Council's hearing statements for matters 6, 7 and 8 propose main modifications to the Plan based on evidence in the *Strategic Housing and Economic Land Availability Assessment 2017* [EB012]. These modifications would change the capacity and/or timing of delivery of some housing sites, and entail the deletion of some other housing sites.

MIQ49A. Please provide a list of the allocated sites that, based on EB012, the Council expects to contribute to the current five year supply of housing with the numbers of dwellings expected to be built on each within that time period.

MIQ52A. What main modifications are required to paragraphs 6.1.1 to 6.1.15; Table 1 (Housing Requirements and Supply 2011-2031); Table 2 (Five Year Housing Land Requirement); Table 3 (Five Year Housing Land Supply); and Figure 1 (Housing Trajectory) to reflect the Council's proposed modifications set out in its hearing statements for matters 7, 8 and 9?

In answering the above question, the Council should clarify whether it considers that the Plan should set out the five year housing land requirement and supply as at 1 April 2017 (rather than 1 April 2016).

A response is requested by **Wednesday 4 October 2017**.

William Fieldhouse
